Therefore, now many people have begun to use tablets and even intelligent phones for work. In addition, a Bluetooth connectivity keyboard that can also be connected with the gadget is proliferating in the market. Unfortunately, not many manufacturers can design a Bluetooth keyboard with excellent ergonomics in the dimensions of a small keyboard either. But this did not happen to Logitech K380. Although the total dimensions are only 124 x 279 x 16 mm, Logitech achieved that the keyboard keys felt cómodas to write. Logitech K380 is not only a matter of different and press one of the numbered buttons á "Easy-Switchá" in the upper left corner of the keyboard to change. among them. The pair was without problems with my iPhone 5S, iPhone 6, Samsung Galaxy S6, iPad Air, MacBook Air test device, Dell and Asus Chromebook. The keyboard can distinguish between Mac and Windows and Android and iOS devices and iOS and maps buttons for compatible functions and shortcuts. It is also compatible with connectivity with Chrome OS and Apple TV devices. You will love the sensation of the key, and it has extended enough to maintain the typical errors to the minimum. Some people don't like round keys (not like boxes), but that is not an important problem.
